## 2014 FUNDING PRIORITIES

Projects are sought that provide multiple ecological and other public benefits, are consistent with the LCCMR Six-Year Strategic Plan for the Environment and Natural Resources Trust Fund ([http://www.lccmr.leg.mn/documents/strategic\\_plan/2009/lccmr\\_strategic\\_plan.pdf](http://www.lccmr.leg.mn/documents/strategic_plan/2009/lccmr_strategic_plan.pdf)), and address at least one of the adopted funding priorities detailed below. Projects should be innovative and must accelerate or supplement, not supplant, existing efforts.

Note: Projects being done to meet regulatory requirements will not be considered for funding. Projects eligible for established topic-specific agency grant programs, such as for clean water implementation and local parks and trails, are encouraged to go directly to that particular agency grant program.

**Proposals must address one or more of the seven funding priorities detailed below. The order of the priorities below does not indicate a level of priority within the priorities.**

### **A. Foundational Natural Resource Data and Information**

Proposals must address one or more of the following:

1. Data acquisition, information management, research, or analysis to develop foundational natural resource or wildlife data and information.
2. Coordination, facilitation, or training pertaining to statewide sharing, distribution, or innovative application of natural resource data (e.g., maps, inventories, and surveys) and information tools (e.g., Geographic Information Systems (GIS), Light Detection and Ranging (LiDAR), and other remote sensing techniques).

### **B. Water Resources**

Proposals must address one or more of the following:

1. Protect or restore water quality by reducing soil erosion, reducing peak water flows, or improving water and land use practices. Projects must include monitoring and evaluation.
2. Research and evaluation to identify the causes of observed changes in the health of fish and wildlife that may pertain to contaminants of emerging concern.
3. Research or engineering design to protect the health of humans and aquatic and terrestrial species by i) advancing development or implementation of standards for nitrates or other contaminants; or ii) broadly reducing levels of nitrates, phosphates, estrogenic, pharmaceutical, or other contaminants in ground and surface waters.
4. Research, monitoring, or evaluation pertaining to i) ground and surface water interaction, protection, conservation, and sustainability, or ii) lake ecosystems, including Lake Superior.

### **C. Environmental Education**

Proposals must address education, information dissemination, and training efforts that will increase the knowledge and skills of students or the public to cultivate a sustainable lifestyle, improve and maintain water quality, reduce and monitor energy and water consumption, or restore and maintain a healthy and biodiverse natural environment. Funding for capital projects (e.g., buildings) will not be considered.

## 2014 FUNDING PRIORITIES

Priority will be given to projects that address one or more of the following:

1. Efforts that are locally-led, involve broad-based partnerships, provide outdoor experiences, or are committed to building a long-lasting and action-based conservation ethic in a community.
2. Efforts that deliver and implement existing curriculum, especially integration of environmental education into school curriculum.

### D. Aquatic and Terrestrial Invasive Species

"Invasive species" includes any plants, animals, insects, and diseases that are non-native, introduced species in the state and that are currently having, or pose a threat to have, significant adverse impacts on Minnesota's native ecosystems and biodiversity. Proposals must address one or more of the following:

1. Prevent introduction or provide early detection of new invasive species.
2. Reduce the spread of invasive species with best management practices along streams, rivers, land transportation routes, and other vectors.
3. Alternative control techniques for containing or suppressing invasive species already present in Minnesota. Standard control and maintenance activities of invasive species will not be considered.
4. Restore lands with native vegetation as practicable following implementation of invasive species control techniques on disturbed lands where a native seed bank no longer exists.
5. Inform and educate landowners about all invasive species threats to their land and offer actions they can take in response.

### E. Air Quality, Climate Change, and Renewable Energy

Proposals must address one or more of the following:

1. Innovative approaches to air quality improvement that reduce impacts on human health, the environment, or natural resources.
2. Acquisition of data at a scale appropriate to assess natural resource changes attributable to climate change.
3. Research to help understand how to mitigate, adapt, or make Minnesota's ecosystems more resilient to climate change impacts, including drought and extreme weather events.
4. Implementation of innovative efforts aimed at mitigating, adapting, or making Minnesota's ecosystems more resilient to climate change impacts, including drought and extreme weather events.
5. Evaluation of applicability and/or effective implementation of clean energy technologies (e.g., biofuels, solar, geothermal, wind) or energy conservation in Minnesota. Examples include efforts involving carbon emissions reduction; community-based, locally-produced renewable energy technologies; renewable energy life cycle costs and impacts; or smart energy technologies.
6. Reduction of greenhouse gas emissions through new and innovative approaches to increasing recycling and composting. Standard, required, and ongoing efforts will not be considered.

### F. Methods to Protect, Restore, and Enhance Land, Water, and Habitat

Proposals must address one or more of the following (see p.7 for additional project requirements pertaining to this category):

1. Innovative protection, restoration, or enhancement of lands with high-quality natural resources, habitat, ecological value, and water protection value.

## 2014 FUNDING PRIORITIES

2. Long term preservation of native forest, wetland, or prairie plant genetics and viability through long term storage in seed banks or other related efforts.
3. Technical assistance for prairie stewardship, forest stewardship, stewardship of Conservation Reserve Program (CRP) lands and other agricultural lands, or aquatic buffer management to improve water quality.
4. Planning and implementation of community-based efforts to permanently conserve natural resources and reduce habitat fragmentation impacts on natural resources, including the impacts of transportation and other infrastructure.

### **G. Land Acquisition for Habitat and Recreation**

Proposals must address fee title or permanent conservation easement acquisition of strategic lands with high quality natural resources, habitat, ecological value, and/or recreational value, and the greatest capacity to contribute multiple conservation benefits to wildlife, humans, and water quality. All lands to be acquired should be part of an adopted state, regional, or local natural resource plan and a restoration/enhancement or management plan for the site must be created. Proposals should provide an explanation as to how such plans will be developed, implemented, and funded.

Priority will given to projects that address one or more of the following (see p.7 for additional project requirements pertaining to this category):

1. Efforts based on precision conservation methods and analysis that quantifiably identify the lands most critical to acquire. Precision conservation is an emerging practice that considers lands in terms of the interconnected systems of which they are a part. As a practice, precision conservation compiles and integrates multiple types of available data layers and analysis (e.g., terrain analysis, soil productivity, habitat potential, economic analysis, erosion potential, proximity to surface water) to identify and guide efforts that will maximize conservation benefits.
2. Efforts involving Scientific and Natural Areas (SNA) or that aim to protect unique ecosystems or rare, endangered, or threatened species.
3. Efforts that enhance habitat connectivity, improve access for natural resource management, or increase public access for recreation, particularly in areas of the state with limited protected public lands.
4. Efforts expanding outdoor recreational opportunities through additions to a state or regional park or trail.

Eligible expenses are those expenses **solely** incurred through project activities that are **directly related to and necessary for** producing the project outcomes described in the proposal. **All proposed expenses *must be specified in the proposal submitted***. Please note that for non-state entities all funds get awarded on a reimbursement basis, unless otherwise authorized, and all eligible expenses will need to be documented. **Eligible expenses may include:**

- a. Eligible expenditures incurred only after the effective date as approved by LCCMR.
- b. Wages and expenses of salaried Recipient employees if specified, documented, and approved. For State Agencies: use of unclassified staff only OR request approval for the use of classified staff accompanied by an explanation of how the agency will backfill that part of the classified staff salary proposed to be paid for with these funds. This is subject to specific discussion and approval by LCCMR.
- c. Fringe benefit expenses limited to salary, FICA/Medicare, retirement, and health insurance of Recipient's employees if specified.

- g. Publication and printing/copying expenses (including the process of composition, plate-making, press work, binding, and the end products produced) necessary for contract administration, work products production, and semi-annual reports relating to accomplishments.
